### **DETAILED ACTION**

Claims 1-13 are pending in this application. Applicant's election without traverse of Group V, claims 12-13, in Paper No. 9 filed 10-23-02 is acknowledged.

In view of the vastness of the claimed subject matter, additional restriction of the claims is required.

#### ***Election/Restrictions***

Group I claims 12 and 13, drawn to a method for qualitative or quantitative determination of proteins, classified in class 530 subclass 350+.

Group II claims 12 and 13, drawn to a method for qualitative or quantitative determination of nucleic acids classified in class 536 subclass 22.1+.

Group III claims 12 and 13, drawn to a method for qualitative or quantitative determination of oligomers classified in class 585 subclass 17+.

Group IV claims 12 and 13, drawn to a method for qualitative or quantitative determination of DNA classified in class 536 and subclass 23.1+.

Group V claims 12 and 13, drawn to a method for qualitative or quantitative determination of RNA classified in class 536 and subclass 25.1+.

Group VI claims 12 and 13, drawn to a method for qualitative or quantitative determination of biological cells classified in class 536 and various subclasses.

Group VII claims 12 and 13, drawn to a method for qualitative or quantitative determination of lipids classified in class 436 and subclass 71+.

Group VIII claims 12 and 13, drawn to a method for qualitative or quantitative determination of polymers or polymer particles classified in class 530 and subclass 300+.

Group IX claims 12 and 13, drawn to a method for qualitative or quantitative determination of drugs classified in classes 546, 548 and various subclasses.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The claims contain a method for qualitative or quantitative determination of proteins, nucleic acids, oligomers, DNA, RNA, biological cells, lipids, polymers, drugs or polymer particles which does not define a contribution over the prior art. The materials which can be determined in claims 12 and 13 vary extensively. When the materials in claims 12 and 13 are taken as a whole, the claims read on many vastly different methods of use. Accordingly, unity of invention is considered to be lacking a restriction of the invention in accordance with the rules of unity of invention is considered to be proper.
